

# Three Things You Can Do for Health Care Reform

## #1 Phone the offices of Senator Kohl, Senator Feingold and your Congressperson

Call your representative toll free at 877-702-0976. Tell them:

\* Will you side with health insurers and vote for legislation that continues their control over health care, or vote for reform that puts patients and their doctors in charge of their health care?

\* I want real health care reform with:

- A quality public health insurance option.
- A requirement for employers to pay their fair share.
- No taxation of workers' existing health care benefits.

**This call takes about 30 to 60 seconds to make. Can you get ten colleagues, friends or family to make the same call?**

## #2 Help set up an event in your district

Opponents of health care reform are working hard to sow doubt and confusion about President Obama's health care reform initiative. We need to make sure that our fellow members are getting the right information on health care reform and that we encourage them to take positive action. Can you work with your local leadership to help set up such an event in your district? We can provide a speaker, template fliers and materials for the event.

## #3 Become a health care presenter

We need speakers who can present the real facts about health care reform in each of our area districts. If enough people are interested, we will hold a "train the trainer" meeting to get you the information, curriculum and presentation materials you need.

If you'd like to help, e-mail us at [healthcare@weac.org](mailto:healthcare@weac.org).
