

Rally with Public Employees and our Community!

Walker is trying to take away labor member's right to collective bargaining.

The Wisconsin Legislature will be voting on a bill that will eliminate the ability for hundreds of thousands of public employees to collectively bargain. ***These union members teach our children, care for the sick, plow our snow, and are a vital part of our community.*** Their jobs, their benefits and their fundamental rights are at stake and we need to tell that enough is enough, we will not stand by and allow working people to be treated this way.
