

Using the health care system wisely

The use of walk-in and urgent care clinics is less expensive than obtaining your health care in an emergency room.

Did you know that ERs charge up to five times more for routine health care services than a doctor's office? The growing use of hospital ERs to obtain routine care is cited as one of the reasons for soaring health care costs. You shouldn't hesitate to use an ER in an emergency, but if you go there when it's not, you often face a long wait and added costs. As an alternative to costly ER visits, you can get non-emergency medical care from local urgent care/walk-in clinics. These facilities are listed below along with the name of the health system to which they pertain. Please note that this is not an all-inclusive list.

Note → You will receive the maximum reimbursement available under your Trust health plan when you access medical care from providers in Trust Preferred Network. You can call our Customer Service Department at (800) 279-4000 if you have questions about a specific provider.
